

“Corrugated Samadhan has added unbelievable value to Dynamics 365 Business Central ERP”.

- A leading packaging company in Europe

A leading packaging company in Europe has been an early ERP adopter. However, they had been looking for a better solution for quite some time. A solution which can bring all its processes in control, make it paperless, reduce human intervention and provide for a robust infrastructure to help them manage their operations with ease and profitably.

Benefits

- All processes, seamlessly integrated into ERP, brought in real-time controls, eliminated redundant processes earlier maintained outside the system, eliminated reconciliation, saving of executive time and improved manageability of the entire business in leaps and bounds.
- It improved the throughput of the business, improved customer satisfaction and addressed the bottom-line favorably.
- The solution is all pervasive now, on the shop floor; dispatch and deliveries are committed and accepted by customers through the system.

Industry

Corrugated carton manufacturing

Region

Europe

Customer size

200 employees

Number of users

About 100 users for one location

Partner

Samadhan (A unit of RITC Pvt Ltd)

“ We have been using Microsoft Dynamics for a very long time but we did not know what we were missing, till we came across Corrugated Samadhan and implemented it at our plant. The solution brought all processes in one system, on Dynamics 365 Business Central, made the entire process paperless and eliminated human interference to a great extent. We were very happy with a professional and supportive attitude of Team Samadhan.

- Controller of Finance and Project Lead

The company is the manufacturing arm of a leading packaging group of Europe; the group has total 24 companies under its umbrella. Since its inception, the company has been offering innovative and cost-effective packaging solutions. The expertise developed over the years has allowed the company to meet the ever-changing market trends and ensure that clients receive the best possible service and product. The company has both the corrugator and conversion facilities on site.

They work with clients from different sectors, including food and beverages, manufacturers of metal and plastic products, pharmaceuticals, along with other diverse sectors, both locally and overseas.

They had been using Microsoft Dynamics 2009 version for a very long time; for over 10 years. They wanted to upgrade to the current version. They looked at this as an opportunity to upgrade, but with an industry-specific solution. Corrugated Samadhan provided precisely what they were looking for!

Integration and hence information in real-time

Controls work the best with full integration. Transactions are effected and information updated about the same simultaneously. No worries about backlogs and reconciliation.

Full cycle of quality assurance

Incoming material, work-in-process, finished good as well as pre shipment inspection built into the solution and in use give a lot of confidence to their customers and also to their colleagues.

Single and double stacker scheduling

The innovative and user-friendly production scheduling engine is a great time saver and money generator by enabling them to increase their throughput, everything else remaining same.

“ Being an early user of ERP we were very alive to the fact that it will help us. However we were not knowing that an industry-specific solution was available with Samadhan.

It was love at first sight when we saw the demonstration. We are very happy to have chosen this solution. It has multiplied the benefits we were having earlier with an ERP by 10 times.

Samadhan has proved to be a very competent, supportive and trusted partner for us. We are very happy with them.”

Dashboards are extremely useful

Role-specific dashboards present all that one cares for as soon as user logs in. Knowing the status is no longer a struggle. No meetings required for this.

Product design interface is a delight

A repository of all that one needs to know about a product, PDI integrates the sales process, estimation, manufacturing and dispatch in sync with each other. Great innovation by Samadhan!

Online electronic approval is extremely comfortable

The flexible engine for approvals is easy to configure and use. We can approve on the move from any device and full tracking of each approval is maintained in the system.

Packaging specificity built in Corrugated Samadhan is unique

Each Paper reel is managed from the time they get in to the plant till they are completely consumed. Glue kitchen and Ink kitchen manage the batches and their traceability with each box manufactured. The solution talks to their machines to and fro. It has made their entire operation paperless. Dispatch and trip planning has made their logistics smooth and efficient. The PDF viewing facility in the ERP is a great help on the shop floor. Even the boiler parameters and electric meter readings are now recorded in the system.

European region-specific statutory requirements are squarely met by the solution.

Solutions like Corrugated Samadhan bring a lot of value to the packaging and paper industry.

“For a company like Samadhan to continuously learn and work in this industry and that too with a world class ERP framework like Microsoft Dynamics augurs well for the industry.

We need such solutions very acutely to address the demands of the environment we work in. Samadhan has slowly addressed all facets of packaging business to include paper and allied products too. I wish them well and am grateful to them on behalf of the industry”, says the Managing Director.
